WORK EXPERIENCE

Senior Full Stack Developer
Domain Agents

04/2026 – Present

- Building and maintaining full-stack features using Angular on the front end and Go (Golang) on the back end.
- Designing and implementing scalable, high-performance services and APIs to support core product functionality.
- Collaborating cross-functionally to translate product requirements into robust, maintainable technical solutions.

Mid Level Software Engineer
Four Principles

01/2025 – 04/2026

Achievements/Tasks

- Working on the official **Riyadh Municipality website**, building and maintaining scalable front-end components.
- Implementing pages and routing using **Next.js & TypeScript**, with a focus on performance and SEO.
- Created interactive forms using React Hook Form, ensuring strong validation and accessibility.
- Integrating front-end features with backend and **Strapi APIs**, also handling data dynamically.
- Using **GitLab** for version control, merge requests, and continuous integration workflows.
- Maintaining design consistency and reusability through **Storybook** documentation.

Junior Full Stack Developer
Interesting Times
